Subject: Contractual agreements between the employer of external workers and the operator of classified areas pursuant to Italian Legislative Decree 101/2020 Art. 112, paragraph 1, letter c)

In compliance with Italian Legislative Decree 101/20 Art. 113, the undersigned Director of GANIL, as operator of classified areas that host external workers from LNL and INFN Firenze, declares that:

- he/she received certification of suitability of the external worker who perform activity in classified areas at the LNL (Article 113, paragraph 2., letter a)
- he/she provides for specific training in relation to the characteristics of the classified area where the activity will be performed (Article 113, paragraph 2., letter c)
- he/she provides specific information and training in relation to prevention and emergency measures (Article 113, paragraph 2., letter d)
- he/she provides the workers with adequate individual dosimeters and guarantee any necessary environmental surveillance (Article 113, paragraph 2., letter f)
- he/she takes the necessary measures so that the dose assessments are recorded by the radiation protection expert in the individual radiation protection passbook for category A workers and they are sent to the employer of the category B external worker (Article 113, paragraph 2., letter h)
- he/she verified, after the acquisition of their classification and the in-depth examination by the radiation protection expert, that the radiation protection classification of the worker is appropriate in relation to the doses that the worker can receive (Article 113, paragraph 2., letter i)
- he/she agreed with the employer of the external worker that the dose constraint (Article 113, paragraph 2., letter I) to which they are subject to is indicated: 0.1 mSv/week effective dose or dose at the lens of eye and 2.5 mSv/week of dose equivalent at the skin or body extremities.

By signing this document, the Employers of the external worker, the undersigned Directors of LNL and INFN Firenze, confirm that:

- she/he made, with the help of the radiation protection expert, the preventive assessment that identifies the nature and extent of the radiological risk that the exposed worker is required to perform at the operator's and the general principles referred to in art. 1 have been considered and respected (Article 112, paragraph 1, letter a) and d)
- she/he provided the radiation protection training (Article 112, paragraph 2., letter e)
- she/he provided the worker with the appropriate personal protective equipment, if prescribed or required -she/he take note of the fact that the individual dosimetric surveillance of the worker will be carried out by the operator
- she/he obtain information about the risks coming from exposure to ionizing radiation in the classified area in which the external worker performs their activity (Article 112, paragraph 1., letter m)
- she/he agree about the dose constraint as indicated: 0,4 mSv/year (Article 112, paragraph 1., letter I)
